A truly wonderful piece of mechansm is the "picking-up" machine used in all grappling and cable-hoisting operations in cable laying. It is a powerful variety of the steam-winch family, but also a most aristocratic and elaborate member, fitted with gear-changing clutches, patent brakes and other ingenious appliances. To give some idea of its capabalities in dry figures, it can at slow speed lift 25 tons at a rate of one mile per hour, or at fast speed ten knots at the rate of four miles per hour Moreover, it can be quickly altered and adapted to changing circumstances in speed or lifting weight, says Lippincott's.

All being made ready, the big grapnel, attached to 700 or 800 fathoms of chain and rope, is passed over the bow-sheave, or pulley, and as soon as it reaches bottom the ship is sent slowly ahead. Back and forward across the path of the cable, as pointed out by the friendly marking buoys, we steam. Several times the grapnel catches something, only to lose its hold again-probably an inequality upon the bottom, although i bosun's mate mumbles "mermaid'sgrottoes"--but at last comes a steady strain. Every soul on board hangs over the bow, watching the grimy grapuel rope come steadily up and over the well-oiled pulley. At length the grapnel itself appears, holding tight on to the truant.

#### CYCLES OF SUN SPOTS.

Fresh Interest Lent to the Subject by Recent Earthquakes and Volcanie Eruptions.

Since 1851, when the existence of a sun spot cycle of about 111/2 years was discovered, many attempts have been made to discover a relation between the sun spots and the atmospheric changes in our earth. Violent storms, floods, periods of drought and of famine, cold years, warm years, and many such variations of weather have all been supposed to owe their origin to the sun spots. But the relation which Sir Norman Lockyer appears to have discovered between sun spot cycles and the tremendous upheavals of the earth which we term earthquakes and volcanoes, lends a fresh interest to this fascinating study, says Golden Penny. The matter certainly deserves very full investigation. Incidentally, the general character of the weather in after the sun spot minimum, and 1902 is also just after the minimum. It was a cold spring in 1867, and a bitterly cold month of May. The summer was very wet, and it was followed by a stormy winter, with little frost, and a very warm spring and summer in 1868.

#### SAILORS IN EOSTON.

Yachting Is One of the Foremost Pleasures and Pastimes of the Hub.

Who sails boats around Boston? Why, everyone! says W. J. Henderson, in Atlantic, From the "Adams Boys," the smartest yacht racers of the east, down to the Marblehead street boy, everyone takes pride in his skill in getting the best work out of some sort of a sailing boat. Those who do not sail talk about it, and on a summer day in the drowsy atmosphere of a Boston elub, or in the shadow of some tall pile in Washington street, you shall hear more rac ing seaman's lore than anywhere else in this country except on the cruising ground of the Rocking Chair fleet at the Larchmont Yacht club. Boston's claim to be the hub of the universe may be disputed perhaps when you consider the steel industry or the unimportant matter of freight tonnage; but when you come to talk about sailing, you must admit that Boston is the greatest yachting port in this country. Even the little children there know the history of the America's cup, and the public school boy can sail a dory with a leg-of-mutton sail for driving power and an oar for steering gear.

#### PIGEONS CARRY DISEASE.

Ohio Health Authorities Suspect the Birds of Causing a Scarlet Fever Epidemic.

An epidemic of scarlet fever, starting in Cincinnati, has spread in the last few weeks through a number of towns in Ohio, and the health au thorities, after taking extraordinary precautions to confine the disease within the limit of its first ravages, were puzzled to understand the means by which it was carried elsewhere, states the Chicago Tribune.

They made an investigation and have now come to the conclusion that much of the contagion was spread by tame pigeons and doves which carried the germs from place

to place. The evidence on which this theory is based is that scarlet fever spread under strict quarantine from a house on the roof of which there was a large pigeon cote. The only live stock about the house not quarantined was the pigeons, which flew about the neighborhood. If they didn't carry the disease germs the authorities don't know

how the fever was spread. Nourishing Rations. Gold prospectors in Alaska sa they can go farther and accomplish eases. It kills the poison in the blood than on any other ration.

#### VACATION DAYS.

Vacation time is here and the children are fairly living out of doors. There could be no healthier place for them. You need only to guard against the accidents incidental to most open air sports. No remedy equals DeWitt's Witch Hazei Salve for quickly stopping pain or remoying danger of serious consequences. For cuts, scalds, and wounds. "I used DeWitt's Witch Hazel Salve far sores, cuts and bruises," says L. B. Johnson, Swift; Tex. "It is the best remedy on the market." Sure cure for piles and skin diseases. Beware of counterfeits.

### POISONING THE SYSTEM.

It is through the bowels that the body is cleansed of impurities. Constipation keeps these poisons in the system, causing beadache, duliness and melancholta at first, then unsightly eruptions and finally serious illness unless a remedy is applied. DeWitt's Little Early Risers prevent this trouble by stimulating the liver and promote easy, healthy action of the bowels. These little pills do not act violently but by strengthening the bowels enable them to perform their own work. Never gripe or distress.

MOTHER ALWAYS KEEPS IT HANDY.

"My mother suffered a long time from distressing pains and general ill health due primarily to indigestion,' says L. W. Spalding, Verona, Mo. 'Two years ago I got her to try Kodol Sha grew better at once and now, at he age of seventy-six, eats anything she wants, remarking that she fears no bad effects as she has her bottle of Kodol handy." Don't waste time doc toring symptoms. Go after the cause If your stomach is sound your health will be good. Kodol rests the stomach and strengthens the body by digesting your food. It is nature's own tonic.

### WARM WEATHER WISDOM

COMBINE COMFORT WITH ECONOMY BY ORDERING A SUMMER SUIT NOW

The proper suit for hot weather wear consists of a quarter-lined coat and trousers, with or without roll-up. The coat properly made up will have the same bang as a full-lined coat. Just enough lining is put in the shoulders to cover the padding necessary to build them up, giving the shoulders the same effect as in a full-lined coat, making it easy and pleasant to slip in and out of the coat. The best part of it all is that besides being perfect in style, the price is much less than for a fullliped coat and ever so much more comfortable. We are now displaying the immense line of

HEAD NOISES GEASE IMMEDIATELY. F. A. WERMAN, OF BALTIMORE, SAYS:

F. A. WERMAN, OF BALTIMORE, SAYS:

BALTIMORE, Md., March to, 1991.

Gerllemen: — Being entirely cared of deafness, thanks to your treatment, I will now give you a full history of my case, to be used at your discretion.

About his wars ago my right ear began to sing, and this kept on getting worse, until I lest my hearing in this car emirely.

I underwent a treatment for catarrh, for three months, without any success, consult da number of physicials, among others, the most eminent car specialist of this city, who told me that only an operation could help me, and even that only temporarily, that the head noises would then cease, but the hearing in the affected ear would be lest forever.

I then saw your advertisement accidentally it a New York paper, and ordered your treatment. After I had used it only a few days according to your directions, the noises ceased, and to-day, after five weeks, my hearing in the diseased car has been entirely restored. I thank you heartily and beg to remain.
